

THE SEIKO TERIOSTAR LP1020

A FAST, RELIABLE, BLUEPRINT SIZE LASER/LED PRINTER

Consider these advantages of the Seiko Teriostar LP1020 high speed laser/led plotter over a traditional inkjet plotter:

#1: Speed: The Seiko is about 10 times faster than the average inkjet plotter (in real world tests).

#2: Time saved for user: The Seiko holds up to 1300 feet of paper in 2 rolls, that means more time before you have to change out the paper and less paper wasted.

#3: Cost per copy: The Seiko 650 feet paper rolls are less cost per square foot than the typical inkjet's 150 foot rolls and the Seiko toner cost less per printed square foot than traditional inkjet plotters.

#4: A better copy: The Seiko laser/led plotter fuses the toner into the paper and therefore the toner image will not smear with a highlighter and it will not run off if it gets wet on the job site, like it would with a print from an inkjet plotter.

#5: Efficient software: The Seiko comes with software so that you can print multiple files with ease and save time. The Seiko software allows anyone you would like on the network to print by just dragging the files into the print software and hit the print button. Traditional inkjet plotters do not include any such software.

We offer a variety of lease, purchase, and rent options.

Lease options range from \$180.00 per month

for a 60 month \$1.00 buyout lease (you will own equipment at end of lease term)

includes brand new equipment, catch basket, software, delivery, installation, and training
