

THE SEIKO TERIOSTAR LP10 OMF, A BLUEPRINT SIZE SCANNER, COPIER, AND PRINTER. ALL COMBINED INTO ONE, EASY TO USE, MULTIFUNCTION DEVICE.

Do you need efficient oversize scanning, copying, and printing?

Consider meeting these needs with the Seiko Teriostar LP1020MF. Its small footprint takes up just 8 square feet of floor space. The LP1020MF has the fastest print speeds in its class making about 6 total 24" x 36" prints or copies per minute. It can automatically feed from 2 paper rolls which hold up to 650 feet of paper in each roll, for a total capacity of 1300 feet. This multifunction unit is the only wide format LED/laser printer that makes use of a user changeable process cartridge (just like your desktop laser printers) designed to maximize printing up-time and minimize service costs, making it one of the most reliable over-size LED printers ever made. The LP1020MF can also scan to your computer, at up to 600 dpi. Color scanning is available as an option.

We offer a variety of lease, purchase, and rent options.

Lease options range from \$265.00 per month for a 60 month \$1.00 buyout lease (you will own equipment at end of lease term) includes brand new equipment, catch basket, software, delivery, installation, and training
